The Latest Generation of
Hyaluronic Acid Filler for Natural
and Long Lasting Results

PERFECTHA® Is the latest generation of hyaluronic acid filler for natural and long lasting results.

Perfectha® is recommended for the correction of fine, medium or deep facial wrinkles and volume loss due to natural aging process.

Q. What is Perfectha®?

A. Perfectha® is a hyaluronic acid based dermal filler that restores volume and fullness of the skin to correct moderate to severe facial wrinkles and folds, such as nasolabial folds, cheeks and lips volume. Your skin will be plumped, beautifully healthy and your facial volume will be restored.

Q. What is Perfectha® made of?

A. Perfectha® is a hyaluronic acid dermal filler of non-animal-origin. Hyaluronic acid is a natural substance that already exists in the human body and is used to provide volume and fullness to the skin. The hyaluronic acid in Perfectha® is a crystal-clear gel with E-Brid Technology. Perfectha® is biodegradable and biocompatible.

Q. Is Perfectha® safe?

A. Yes. Perfectha® has been used by dermatologists and plastic surgeons since 2007 worldwide. There is limited risk of allergic reaction. Perfectha® is biocompatible and allergy testing is not required. After your treatment, you might have some redness or swelling. This will normally disappear in a couple days. Sunbathing and cold outdoor activities should be avoided until any redness or swelling disappear. If you are pregnant, breastfeeding, or under 18, Perfectha® treatment is not recommended.

Q. Can Perfectha be used anywhere on the face?

A. Perfectha® has been used in more than 1.5 million treatments in over 70 countries to correct a variety of wrinkles. Your doctor will discuss with you prior to your injection regarding common treatment areas.

Q. How long does Perfectha® last?

A. Perfectha® is proven to deliver long-lasting results. Studies have shown that Perfectha® effects generally last for about 18 months. Perfectha's E-Brid technology helps to maintain the cosmetic effect until the injected gel is nearly gone.

Q. How often should I have Perfectha® treatments done?

A. Treatments can be up to twice a year. Having a touch-up treatment before the product has been fully dissipated may enhance the lasting effect.

Q. What should patients do prior to treatment?

A. Perfectha® requires no pretesting, but you should take a few precautions before being treated. Avoid using aspirin, non-steroidal anti-inflammatory medications. Also, if you have previously suffered from facial cold sores, discuss this with your physician. He/She may consider prescribing a medication to minimize recurrence.

Q. Is the procedure painful?

A. Perfectha® is injected directly into the skin in tiny amounts by an ultrafine needle, resulting in minimal discomfort. The procedure is simple and convenient, and results are practically instantaneous. To optimize your comfort during the short procedure, your physician may anesthetize the treatment area.

Q. How much do Perfectha® treatments cost?

A. Perfectha® is a customized procedure based on your

specific needs, so the cost will vary from patient to patient. In general, the cost of Perfectha® is comparable to the cost of similar procedures. Because Perfectha® is long lasting, it proves to be very economical over the long term. Please consult your physician to determine the best recommendation for your particular needs.

Q. Who is Sinclair ?

A. Sinclair is a pharmaceutical company with a core expertise in dermatology and it has developed a complete portfolio in aesthetics to come along doctors needs and match your aesthetic demands thanks to a large range of safe implants.
