

SERUM C APPLICATION GUIDELINES

Quintessence
Skin Science™

Instructions:

- 1 Serum C is recommended in the mornings in order to maximize the antioxidant benefits of protection from UV light induced oxy-radicals. It can also be used with equal effectiveness twice a day (A.M. and P.M.).
- 2 Only a very small drop should be applied to fingertip for application to face.
- 3 Dab a drop gently on forehead then on cheeks and chin then spread evenly around the entire face. Use a small drop at a time, for each area & only add more if the drop was insufficient to cover the entire area.
- 4 Apply another small drop for antioxidant protection to neck and separate small drops for exposed chest area & hands/ arms.
- 5 Allow the serum to penetrate the skin for a few minutes before applying other products. If it feels oily or sticky, too much was applied.

Optional: To reduce steps place a small amount of Facial Moisturizer or Lotion into the palm of the hand & apply a few droplets of Serum C onto it. Blend the two together with your fingertips and apply to face.

For the Body: Mix several drops of serum C with your Body Lotion and apply to Body.

Serum C is non-comodogenic , water soluble and fully absorbed by the skin. However it is a highly concentrated anhydrous solution (this is necessary for stabilization of the active ingredient, L-Ascorbic acid). For this reason it must be applied in very small dabs at a time. It is important to instruct patients in the proper application of the Serum C, so the patient can experience the effective antioxidant and collagen stimulating benefits of the L- Ascorbic Acid.
